

Screen Test

The background features several flowing, translucent ribbons of color. A prominent red ribbon curves from the bottom left towards the center. Another ribbon, transitioning from orange to yellow to green, flows from the top left. A blue and cyan ribbon flows from the top right towards the bottom right. The ribbons have a soft, ethereal quality with some internal texture visible, set against a solid black background.

Data Collection

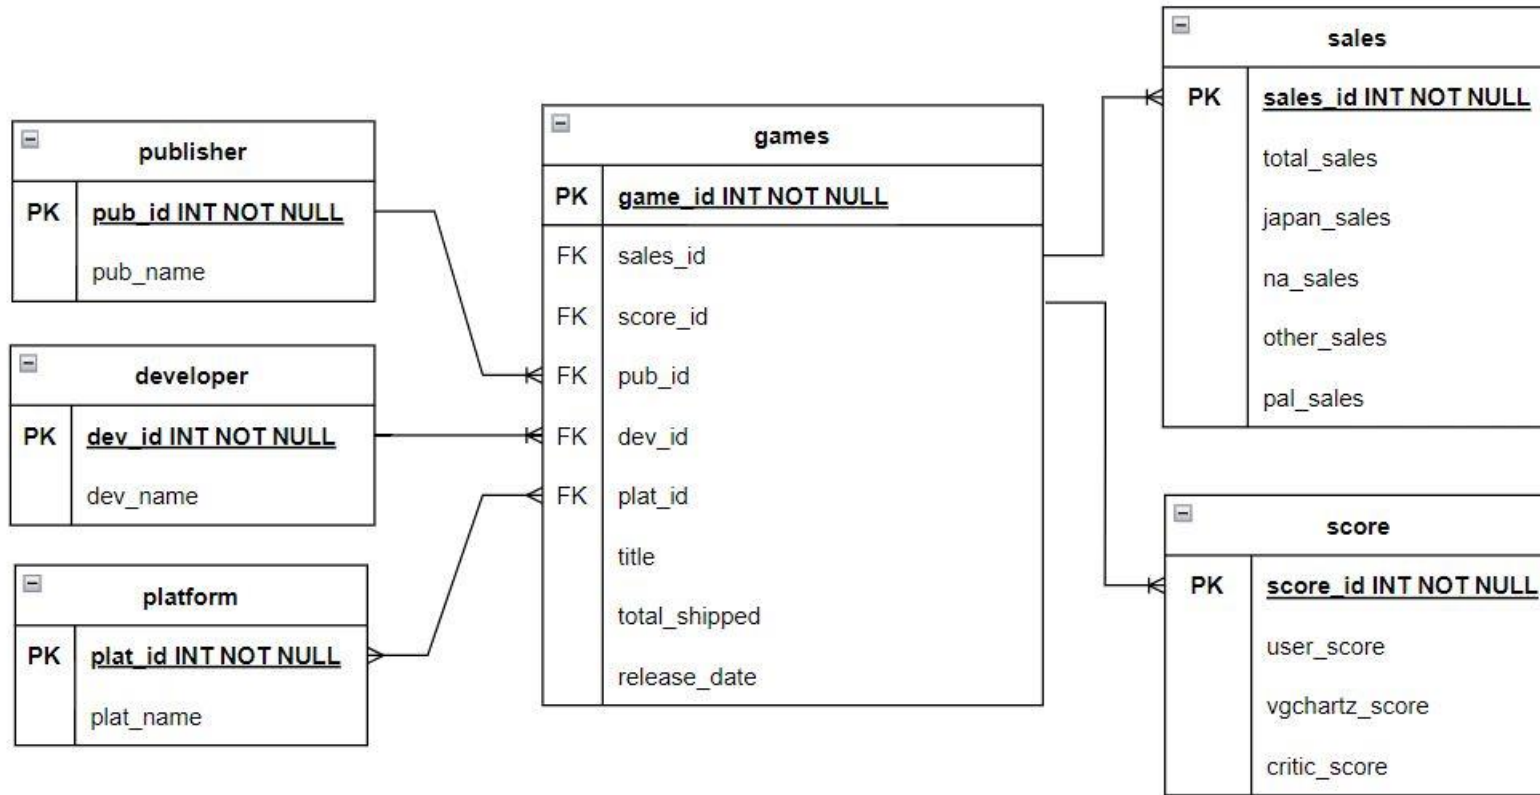

About Dataset

- Data source is from Kaggle
<https://www.kaggle.com/datasets/patkle/video-game-sales-data-from-vgchartzcom>
- This dataset contains ~60k video games data from VGChartz:
- It includes:
 - Title
 - Sales (total, North America, Japan, PAL region + other)
 - Total shipped
 - Publisher
 - Developer
 - Release Date
 - Platform
 - Scores (user, VGChartz & critic score)

Data Cleaning 1

- Using SQL to clean data.
- Remove empty rows (if any)
- Remove unwanted columns (example: column “pos”)
- Replaced all N/A with NULL
- Create new tables, and primary keys.

Data Cleaning 2

- Remove the last letter 'm' (as in *millions*)
- Multiply (x1000000) into these fields.
- Change data type.

```
UPDATE games SET total_sales = LEFT(total_sales, LENGTH(total_sales)-1);
UPDATE games SET total_sales = (total_sales::numeric *1000000) WHERE total_sales IS NOT NULL;
ALTER TABLE games ALTER COLUMN total_sales TYPE NUMERIC(15,1) USING total_sales::NUMERIC;
```

UPDATE games SET release_date = substring("release_date",1,2) || ' ' || substring("release_date",6,6);
UPDATE games SET release_date = to_date("release_date", 'DD Mon YY') WHERE "release_date" is not null;
ALTER TABLE games ALTER COLUMN release_date SET DATA TYPE DATE USING release_date::DATE;
```

- Remove characters at positions 3 & 4.
- Change text format (DD Mon YY) into yyyy-mm-dd.
- Change Data Type.
